AI-Powered CRM

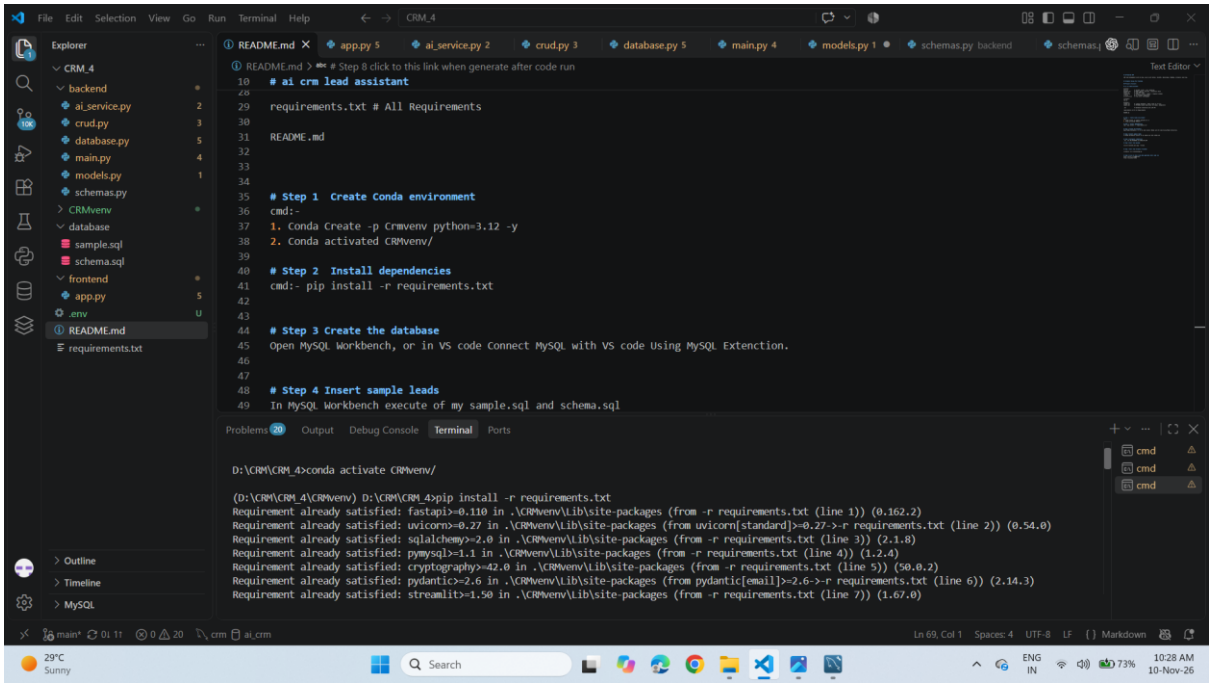

CRM lead management with AI help, built with Python, FastAPI, SQLAlchemy, PyMySQL, Streamlit and Groq.

Steps

1. **how to create and activate environment.**

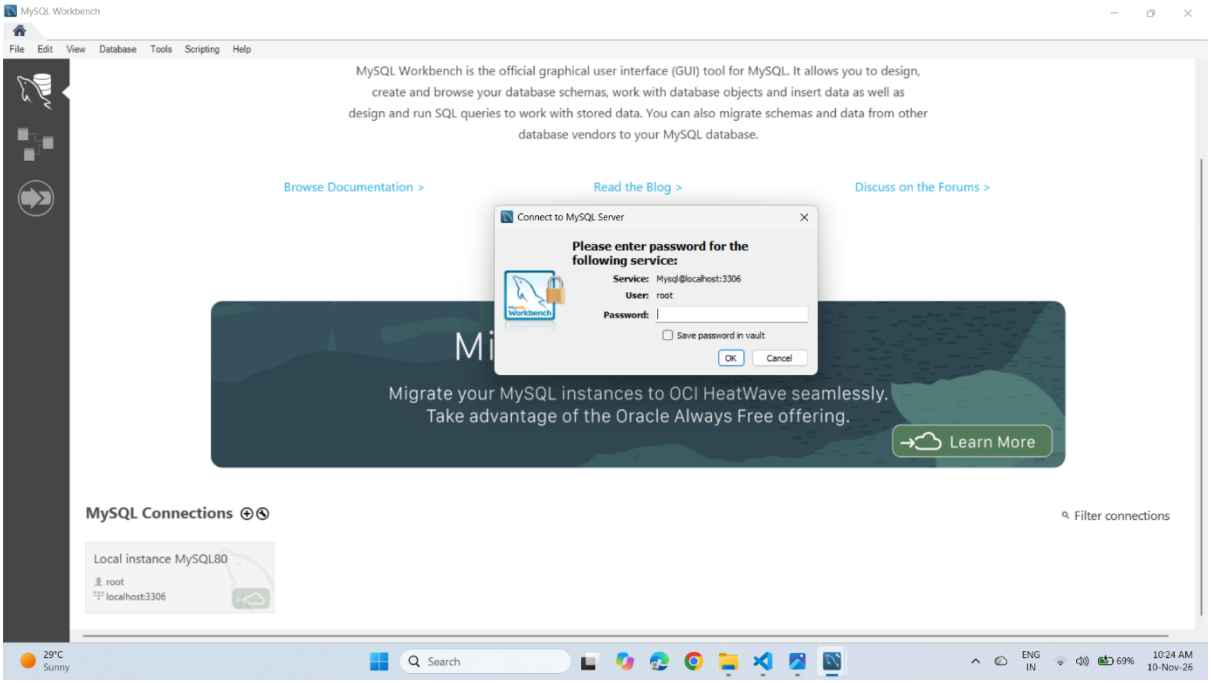

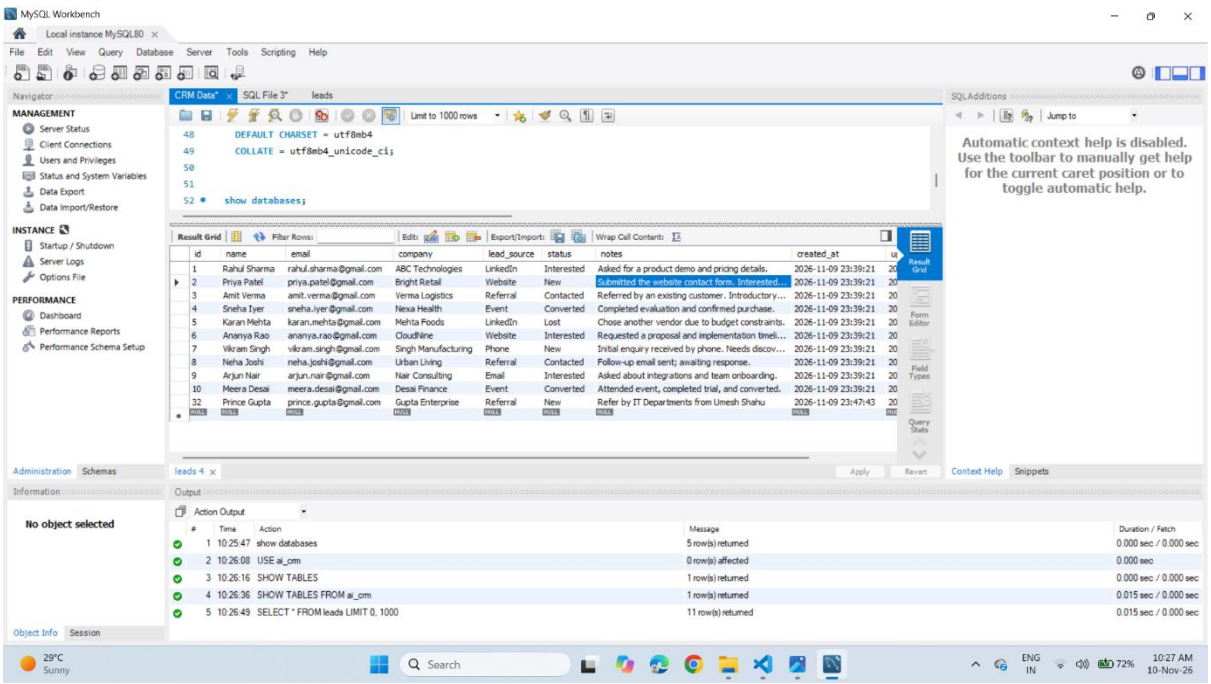

2. **How to Install Install dependencies**

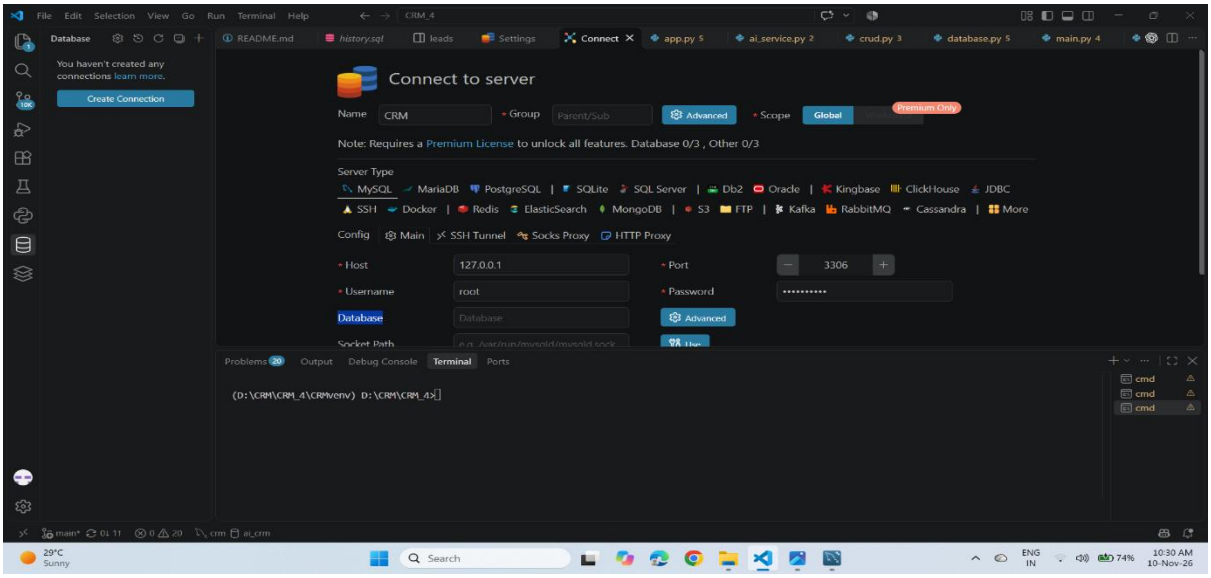

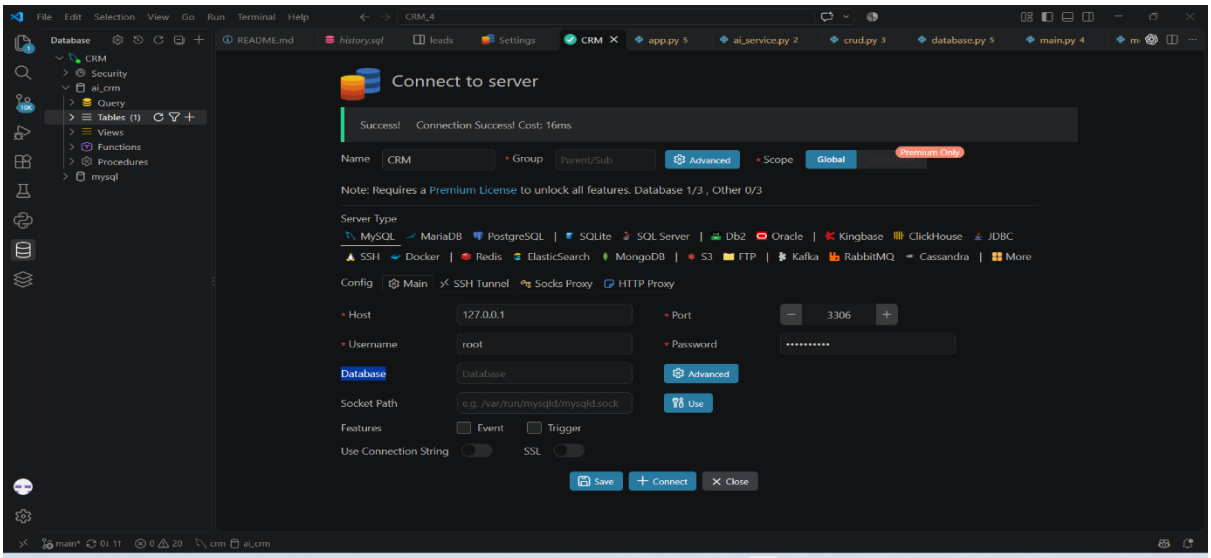

3. **How to create Databases**

   Open MySQL Workbench, or in VS code Connect MySQL with VS code Using MySQL Extenction.

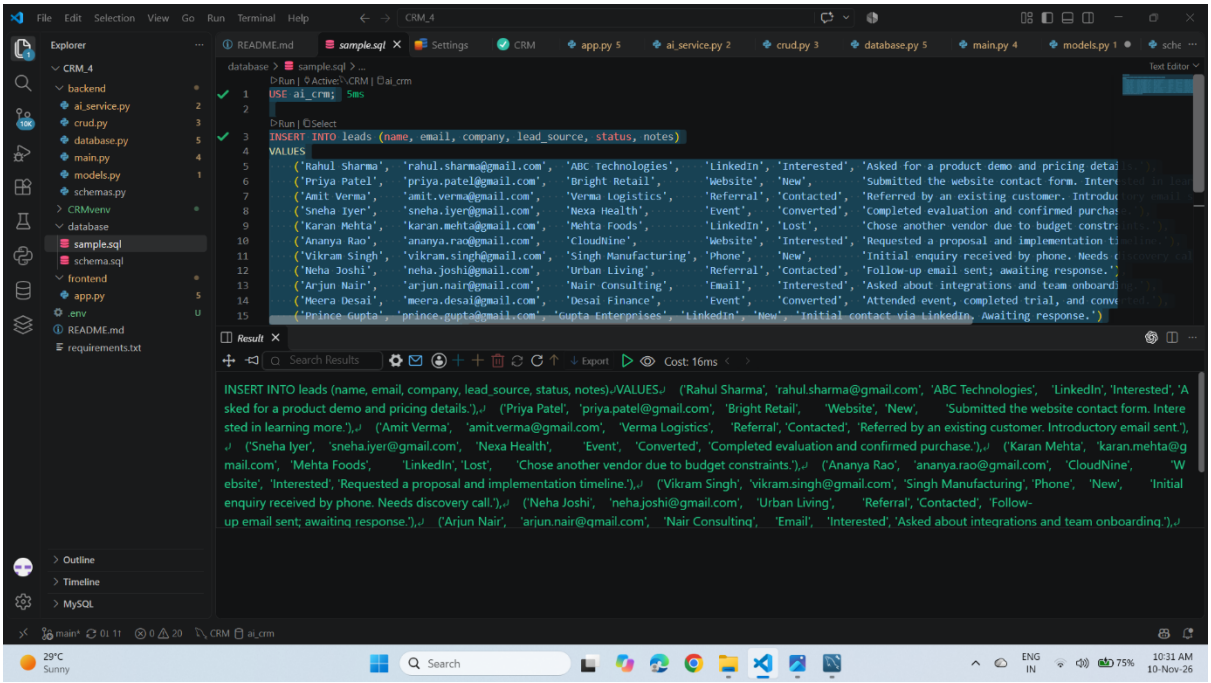

Connect to server

Generate Overall CRM Insights
Based on the CRM snapshot provided, here is an analysis of the sales pipeline.
1. Overall Performance
Observed Facts:
The total lead volume is 11.
The overall conversion rate is 18.18% (2 converted out of 11).
All 11 records were created on 2026-11-09, indicating a very recent batch of leads or a data snapshot limited to a single day.
Analysis:
With a sample size of only 11 leads, the 18.18% conversion rate is statistically fragile. A single additional conversion or loss would significantly alter this percentage.
The pipeline is heavily weighted toward early stages: 8 out of 11 leads (72.7%) are in "New," "Contacted," or "Interested" statuses, suggesting the team is currently in the top-of-funnel or mid-funnel phase for this cohort.
2. Strongest Lead Source

2. Strongest Lead Source
Observed Facts:
Referral: 3 leads (1 Converted? No, 0 Converted; 2 Contacted, 1 New). Correction based on records:
Referral Leads: Prince Gupta (New), Neha Joshi (Contacted), Amit Verma (Contacted). 0 Converted.
Event: 2 leads (2 Converted: Meera Desai, Sneha Iyer). 100% Conversion Rate (2/2).
Email: 2 leads (0 Converted; 2 Interested).
LinkedIn: 2 leads (0 Converted; 1 Lost, 1 Interested).
Phone: 1 lead (0 Converted; 1 New).
Website: 1 lead (0 Converted; 1 New).
Analysis:
Event is the only source with a 100% conversion rate in this dataset. Both leads from this source (Meera Desai and Sneha Iyer) are marked as "Converted."
Referral has the highest volume (3 leads) but currently has zero conversions.
Recommendation: While "Event" appears most effective based on the 2/2 conversion data, the sample size is extremely small (n=2). It is premature to declare it definitively "most effective" without more data. However, it is the only source with proven conversions in this snapshot.
3. Status Distribution
Observed Facts:
New: 3 leads (27.3%)
Contacted: 2 leads (18.2%)
Interested: 3 leads (27.3%)
Converted: 2 leads (18.2%)

Recommendation: While "Event" appears most effective based on the 2/2 conversion data, the sample size is extremely small (n=2). It is premature to declare it definitively "most effective" without more data. However, it is the only source with proven conversions in this snapshot.
3. Status Distribution
Observed Facts:
New: 3 leads (27.3%)
Contacted: 2 leads (18.2%)
Interested: 3 leads (27.3%)
Converted: 2 leads (18.2%)
Lost: 1 lead (9.1%)
Analysis:
The pipeline is balanced between early engagement (New/Contacted: 5 leads) and active interest (Interested: 3 leads).
The "Lost" category contains only 1 lead (Karan Mehta), which was lost due to budget constraints.
4. Conversion Opportunities
Observed Facts (High-Intent Leads):
Ananya Rao (CloudNine, Email, Interested): "Requested a proposal and implementation timeline." This indicates a high level of intent, moving toward a purchase decision.
Rahul Sharma (ABC Technologies, LinkedIn, Interested): "Asked for a product demo and pricing details." This is a standard mid-funnel request, indicating active evaluation.
Arjun Nair (Nair Consulting, Email, Interested): "Asked about integrations and team onboarding." This suggests technical fit is being evaluated, a common pre-purchase step.

4. Conversion Opportunities
Observed Facts (High-Intent Leads):
Ananya Rao (CloudNine, Email, Interested): "Requested a proposal and implementation timeline." This indicates a high level of intent, moving toward a purchase decision.
Rahul Sharma (ABC Technologies, LinkedIn, Interested): "Asked for a product demo and pricing details." This is a standard mid-funnel request, indicating active evaluation.
Arjun Nair (Nair Consulting, Email, Interested): "Asked about integrations and team onboarding." This suggests technical fit is being evaluated, a common pre-purchase step.
Analysis:
These three "Interested" leads represent the most immediate opportunities for conversion.
Ananya Rao is likely the closest to closing, as requesting a proposal/timeline usually precedes a final decision.
Rahul Sharma and Arjun Nair require immediate follow-up to address their specific questions (demo/pricing and integrations/onboarding) to prevent stalling.
5. Practical Sales-Team Improvements
Observed Facts:
New Leads (3): Prince Gupta (Referral), Vikram Singh (Phone), Priya Patel (Website).
Vikram Singh's note explicitly states: "Needs discovery call."
Prince Gupta's note mentions a referral from "IT Departments from Umesh Shahu."
Priya Patel submitted a contact form.
Contacted Leads (2): Neha Joshi (Referral), Amit Verma (Referral).
Both are awaiting response after initial contact.

Priya Patel: Respond to the website form inquiry promptly to maintain momentum.
2. Follow-Up on "Contacted" Leads:
Neha Joshi & Amit Verma: Both are "awaiting response." Implement a structured follow-up cadence (e.g., 3-day, 7-day, 14-day) to re-engage them without being intrusive.
3. Address High-Intent "Interested" Leads:
Ananya Rao: Prepare and send the proposal and implementation timeline immediately.
Rahul Sharma: Schedule the product demo and provide pricing details.
Arjun Nair: Provide specific information on integrations and team onboarding processes.
4. Source-Specific Strategy:
Referrals: Despite high volume (3 leads), there are no conversions yet. Ensure the referral process includes clear next steps and timely follow-up.
Events: Since both event leads converted, analyze what specific event activities (e.g., trial completion, evaluation) led to conversion and replicate this playbook for future events.
LinkedIn: One lead was lost due to budget. Consider qualifying budget earlier in the LinkedIn outreach process to avoid wasting time on leads that cannot afford the solution.
